

Vraj Patel

(714) 726-4605 | vrajpatel00222@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Fullerton, CA

EDUCATION

M.S. Computer Science · *California State University, Fullerton* · GPA: 3.75/4.00 Aug 2024 – May 2026
B.Tech. Information & Communication Technology · *Marwadi University, India* · GPA: 3.7/4.00 Jul 2019 – Apr 2023

EXPERIENCE

Teaching Associate & Teaching Assistant *California State University, Fullerton* Aug 2025 – May 2026
• Taught CPSC 131 (Data Structures) and CPSC 335 (Algorithm Engineering) to 100+ students; automated grading with Python + Gradescope, cutting turnaround ~40% across 200+ weekly submissions.

Research Assistant *Yuan-Ze University, Taiwan* Jul 2023 – Feb 2024
• Designed and benchmarked unsupervised LSTM-Autoencoder models for ECG anomaly detection on the MIT-BIH dataset using TensorFlow/Keras — achieving competitive accuracy with zero labeled training data.
• Co-authored IEEE peer-reviewed paper presented at ICCE 2024 (Las Vegas); research is cited in follow-on cardiac deep learning studies.

Software Developer *Lucent Innovation, Ahmedabad* Feb 2023 – Jul 2023
• Engineered full-stack features using Python, Django REST Framework, and PostgreSQL for e-commerce platforms; built RESTful APIs with JWT auth, RBAC, and paginated endpoints serving thousands of daily users.
• Configured CI/CD pipelines with GitHub Actions, integrated third-party payment and logistics APIs, and optimized MySQL schemas with index tuning reducing average API response times by 25%.
• Shipped all features within two-week Agile sprints with full test coverage; used JIRA for sprint tracking and Postman for endpoint validation.

Software Developer Intern *RKIT Software Private Limited, Rajkot* May 2022 – Jul 2022
• Built enterprise web modules using C#, ASP.NET Core MVC, and SQL Server; wrote optimized stored procedures and indexed queries that reduced page load times by 30%.

PROJECTS

GitConnect - AI-Powered Developer Mentorship Platform · **HackDartmouth X** · **\$1,000 Novita AI Prize**
React · Vite · GitHub API · Gemini AI · Tailwind CSS · Vercel | git-connect.co
• Solo-built and deployed a full production platform in under 24 hours only solo developer to win any prize track. Matches students with mentors by analyzing GitHub commit history and language proficiency; uses Gemini AI to auto-generate developer skill profiles with animated, interactive cards.

GreenLane - AI Sustainability Shopping Assistant
TypeScript · React · Chrome Extensions API · Node.js · Meta ExecuTorch (On-Device AI) | [GitHub](#)
• Built a privacy-first Chrome extension that intercepts Amazon product pages in real-time, computes sustainability scores, and surfaces greener alternatives using on-device AI inference via Meta's ExecuTorch, with zero external data transmission.

Intelmaxxing - Off-Grid Career Intelligence Platform · **Citrus Hack XI** · **Best Solo Hack Winner**
Next.js 16 · TypeScript · Gemma 4 (Novita / Ollama) · ElevenLabs | [Intelmaxxing.tech](https://intelmaxxing.tech) | [GitHub](#)
• Solo-built a "Palantir Gotham for careers" platform deploying 5 parallel AI agents (FOXHOUND, WIRETAP, GHOSTNET, PROFILER, DOSSIER) that scrape off-LinkedIn signals — HN who-is-hiring threads, fresh funding rounds, YC batches, GitHub activity, and Reddit chatter — to surface companies likely to hire 0–6 months before postings drop.
• Engineered a noir-themed evidence board UI with ElevenLabs voice briefings (per-company MOAT pitches, red-flag warnings, 15-sec spy hooks) and a dual-provider LLM layer (cloud Novita + local Ollama with auto-fallback), generating ranked dossiers with cold-email drafts, CEO/CTO contacts, and Reddit red-flag intel in 18–30s end-to-end.

TUI - Terminal UI Library for AI Agents
TypeScript · Node.js · Open Source | [GitHub](#) | [npm](#)
• Published an open-source npm library of interactive terminal UI primitives (spinners, prompts, progress bars, tables) purpose-built for AI coding agents reached 54 peak weekly downloads, adopted by developers building human-in-the-loop agentic CLI workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL
Frameworks: React, Next.js, Node.js, Express.js, Django, Tailwind CSS, Vite
Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD, Vercel
Databases: PostgreSQL, MySQL, MongoDB
Tools: Git, Postman, VS Code, Claude Code, Cursor

PUBLICATION

I. Farady, V. Patel, C.-C. Kuo, C.-Y. Lin. "ECG Anomaly Detection with LSTM-Autoencoder for Heartbeat Analysis," Proc. IEEE ICCE 2024, Las Vegas. DOI: [10.1109/ICCE59016.2024.10444327](https://doi.org/10.1109/ICCE59016.2024.10444327) (cited in follow-on cardiac deep learning research)
