

Vraj Patel

(714) 726-4605 | vrajpatel00222@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Fullerton, CA

Software Engineer with M.S. CS and **2+ years** building TypeScript and Python backends, REST APIs, and production AI agent systems end-to-end. **IEEE-published** in deep learning and **two-time solo hackathon winner** shipping multi-agent LLM products solo. Active open-source contributor building developer tooling for parallel AI coding agents.

EDUCATION

M.S. Computer Science · *California State University, Fullerton* · GPA: 3.75/4.00 Aug 2024 – May 2026

B.Tech. Information & Communication Technology · *Marwadi University, India* · GPA: 3.7/4.00 Jul 2019 – Apr 2023

EXPERIENCE

Software Developer · *Lucent Innovation, Ahmedabad* Feb 2023 – Jul 2023

- Owned full-stack feature delivery on production e-commerce platforms shipping **TypeScript and React** modules (order dashboards, admin panels, customer-facing storefronts) against **Python and Django REST Framework** services backed by **PostgreSQL**.
- Designed **REST APIs** with **JWT** auth, role-based access control, and pagination; integrated third-party payment and logistics providers end-to-end including webhook handling and retry logic.
- Tuned MySQL query plans and indexes against slow-query logs, and shipped **GitHub Actions CI/CD** with linting, tests, and Docker image builds gating every merge to main.

Software Developer Intern · *RKIT Software Private Limited, Rajkot* May 2022 – Jul 2022

- Built and shipped interactive **JavaScript and jQuery** frontend modules for an internal ERP dynamic form validation, AJAX-driven dashboards, and async data tables consuming REST APIs serving production users.
- Owned multiple CRUD modules end-to-end from spec through production deploy, including **SQL Server schema design**, optimized queries, and unit-tested code reviewed and merged into the company's main release line.

Teaching Associate · *California State University, Fullerton* Aug 2025 – May 2026

- Taught CPSC 131 (Data Structures) and CPSC 335 (Algorithm Engineering) to 100+ students; automated grading pipelines in Python on Gradescope processing 200+ weekly submissions.

Research Assistant · *Yuan-Ze University, Taiwan* Jul 2023 – Feb 2024

- Designed unsupervised **LSTM-Autoencoder** models for **ECG** anomaly detection on MIT-BIH using TensorFlow/Keras; co-authored **IEEE paper at ICCE 2024** (Las Vegas), cited in follow-on cardiac deep-learning research.

PROJECTS

IntelMaxxing - Off-Grid Career Intelligence Platform · **Citrus Hack XI** · **Best Solo Hack Winner**

Next.js 16 · TypeScript · Gemma 4 (Novita / Ollama) · ElevenLabs | [IntelMaxxing.tech](#) | [GitHub](#)

- Engineered a **multi-agent orchestration** platform with **5 parallel AI agents** and dual-provider LLM routing (cloud **Novita** + **local Ollama** auto-fallback), generating ranked company dossiers in 18–30s from **HN, GitHub, Reddit, and YC signals**.
- Designed a noir-themed evidence board UI with ElevenLabs voice briefings and auto-generated cold-email drafts with verified CEO/CTO contact resolution.

GitConnect - AI-Powered Developer Mentorship Platform · **HackDartmouth X** · **\$1,000 Novita AI Prize**

React · Vite · GitHub API · Gemini AI · Tailwind CSS · Vercel | [git-connect.co](#)

- Solo-built and deployed in under 24 hours (only solo developer to win a prize track); matches students with mentors by analyzing GitHub commit history and language proficiency via **Gemini AI**.

Agent-Farm - Parallel Claude Code Orchestrator over Git Worktrees

TypeScript · Electron · git worktrees · Claude Code SDK · Ink (TUI) | [GitHub](#)

- Lets a single developer run multiple Claude Code agents in parallel** on different tasks at once, each isolated in its own git worktree so they never conflict then surfaces every diff for one-click review and cherry-pick into main. Same problem space as Conductor and Emdash (YC), built solo.
- Handles the full agent lifecycle natively on macOS** branch creation, sandboxed execution, live log streaming per agent, and conflict-aware merging turning "review 5 PRs from 5 agents" into a single in-app workflow.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, SQL, C++

AI / Agents: Anthropic Claude API & SDK, OpenAI SDK, Vercel AI SDK, Ollama, MCP, RAG, multi-agent orchestration

Frameworks & Runtime: Next.js (App Router), React, Node.js, Express, Django, FastAPI, Electron, Ink, Tailwind CSS

Infra & Tools: AWS (EC2, S3, Lambda), Docker, GitHub Actions, CI/CD, Vercel, PostgreSQL, MySQL, MongoDB, Redis, Git, Postman, Claude Code, Cursor
